## School Recommendation for Non-School Therapist

The school has identified a specific student that cannot be served by Summit Counseling. I have conferred with the student/family and recommend the person listed below be approved to work periodically with the student at school.

The therapist understands that a criminal background check is required.

The therapist understands that services can only be rendered to specific student(s) with prior approval from the school and parent(s).

The therapist understands that he or she is not employed by Haywood County Schools. Any compensation for services will come from the family or the family's insurance provider(s).

The therapist understands that his or her approval to work at school may be denied at any time without prior notice.
